

### **Rising Green Steel Premiums in Europe: Limited Volume but Growing Demand**

February 17, 2025

Synopsis: Green steel premiums in Europe have seen a slight increase, with premiums for steel produced in electric-arc furnaces offered at €200-300 per metric ton. While traded volumes remain limited, demand for green steel is growing, particularly in Nordic countries, supported by state-funded projects and the EU's decarbonization efforts.

### **BlueScope Steel's 1H FY2025 Sustainability Report: Advancing Safety, Climate Strategy, and Inclusion**

February 17, 2025

Synopsis: BlueScope Steel made significant strides in its sustainability goals during the first half of FY2025. While focusing on safety through the launch of its Refocus on Safety program, the company also progressed in its climate initiatives, including efforts in emission reduction and ironmaking technology development. Additionally, gender diversity remained steady, and BlueScope continued to enhance its supply chain oversight.

### **Pioneering Green Hydrogen: P2X Solutions Launches Finland's First Commercial Production Plant**

February 17, 2025

Synopsis: P2X Solutions, a Finnish leader in green hydrogen innovation, has officially begun commercial operations at its Harjavalta plant. This milestone marks a crucial development for Finland's hydrogen economy and positions the country as a potential superpower in clean hydrogen production. The 20 MW facility aims to help reduce emissions across industries, supporting a transition to electric fuels.

### **Aceros Arequipa Climbs to the Top 5 of Dow Jones Sustainability Index**

February 17, 2025

Synopsis: Aceros Arequipa, a leading Peruvian steel company, has been ranked in the Top 5 of the Dow Jones Sustainability Index MILA Pacific Alliance, being the only steel company among seven Peruvian firms to receive this prestigious recognition. This achievement further solidifies the company's leadership in sustainability within the steel sector.
